Tenet

AI governance for K-12 schools

FOR TEACHERS · TENET EDGE

Your classroom rules. Inside the AI they use.

Tenet is the AI governance platform for schools. Set how AI should teach, keep class expectations active by period and after school, and see how students use it.

Same AI tools. Your teaching instructions.

PERIOD 2 · SPANISH — **Gemini**

> **Your rule:** In this Spanish immersion class, respond in Spanish. Ask questions that build understanding.

STUDENT

How do I describe what I did yesterday?

AI WITH YOUR RULE

¿Qué hiciste ayer? Empieza con «Ayer...».

PERIOD 3 · ALGEBRA — **ChatGPT**

> **Your rule:** Coach one step at a time. Do not give the completed solution.

STUDENT

Solve 3x + 8 = 29 for me.

AI WITH YOUR RULE

Which operation would undo the +8 first? Try that on both sides.

Tenet District applies your class rule automatically as the period changes.

AFTER THE BELL

Homework keeps its rules.

Set a take-home rule for each class. Tenet matches homework to the subject; unmatched work keeps the district baseline.

BEFORE CLASS

Test the student experience.

Use Test Drive to try your rule before class. Set approved AI, class site lists, or Block All AI for an assessment.

DURING USE

See when students need guidance.

Review blocked use, rule violations, and incident details. Coach the student, adjust the rule, or escalate with context.

YOUR TEACHER DASHBOARD

Manage class rules and review student misuse.

Set class and homework rules. Review your classes' AI activity, block reasons, and flagged incidents.

Set class rules → Apply by period → Review flagged use → Follow up

INSIDE THE AI TOOLS YOUR SCHOOLS ALREADY USE

ChatGPT · Claude · Gemini · Microsoft Copilot

Grok · MagicSchool · SchoolAI · Brisk Boost

Bring one lesson. See your rule in action.
